

WINFAB manufactures fabrics designed to meet today's advanced engineering requirements for stabilization, separation, filtration, reinforcement, and erosion control.

DESCRIPTION

The **WINFAB** High Visibility Wattle is a reusable, portable sediment control device to address storm water runoff and sediment control needs.

The **WINFAB** High Visibility Wattle is a sediment control device designed to filter and reduce the velocity of storm water runoff and promote the settling of sediment behind the wattle. The high visibility wattle includes lifting straps for easy portability, and can be moved daily or staked to fit your jobsite needs. The WINFAB High Visibility Wattle is manufactured of durable monofilament polypropylene fabric and filled with pine straw. It is tough enough for the job and light enough for mobility and flexibility.

BENEFITS

- Controls sediment runoff.
- Reduces storm water velocity.
- Reusable and easily relocated.
- High visibility.
- Flexible straps for easy handling.
- Move or stake as needed.
- Easy Maintenance.
- Resistant to movement against wind, water, and sediment.
- Reusable.
- Dries quickly

AVAILABLE PRODUCTS

- 9" x 12'
- 9" x 15'
- 9" x 18'
- Custom sizes available
