

WINFAB[®]

Geotextiles & Erosion Control

Established in 1994, WINFAB specializes in the domestic manufacturing of high-performance geotextile and erosion control products engineered for civil construction and environmental applications. The company is an American owned and operated organization with two production facilities located in the heart of Georgia.

We are driven to support the industry by delivering on continual improvement and innovation of products, expanding our geotextile and erosion control product manufacturing capabilities, while providing superior customer service and quality. Simplify supply chain complexity by partnering with WINFAB.
